

Course Outline

The course comprises two areas of study:

Design: Candidates study the design process from brief to design proposal. This helps them develop skills in initiating, developing, articulating and communicating design proposals. They gain an understanding of the design/make/test process and the importance of evaluating and resolving design proposals. Learners also develop an understanding of the factors that influence the design of products

Manufacture: Learners study the manufacture of prototypes and products. This helps them develop practical skills. They gain an appreciation of the properties and uses of materials, as well as a range of manufacturing processes and techniques, allowing them to evaluate and refine design and manufacturing solutions.

The course assessment consists of two parts: -

- A formal written examination marked externally by the SQA
- A linked Design and Make Assignment undertaken in class but marked externally by SQA. The Assignment contributes 55% to the overall course assessment.

To improve on his current performance with **National 5 Design and Manufacture** your child could use some of the following strategies:-

Strategy	✓
Attend all classes	
Be on time for classes	
Apply more effort in class to ensure all work is completed	
Work safely and follow teacher instructions at all times	
Inform the teacher of areas of work that are you are finding difficult	
Discuss the progress of your assignment at home and undertake any relevant research work	
Practice sketching techniques at home	
Ensure all practical work is undertaken neatly and accurately	
Ensure all written work is presented neatly and accurately	
Ensure deadlines are met for SQA assignments and projects	
Complete all homework tasks set and submit them on time	
Attend supported study classes on offer	
Read your revision notes to develop your knowledge and understanding	
Use appropriate terminology associated with the subject	
Identify command words at the start of questions to ensure questions are answered properly	
Complete all extension or revision tasks	
Use non-contact periods to work with peers to share ideas and complete tasks	
Manage time to ensure all areas of the assignment are completed to the required standard	
Engage more with classroom discussions to develop knowledge and understanding	
Make effective use of SQA past papers
